10	\$600.00	\$575.00	\$491.00	\$214.00	\$275.00

**Notes:**

- Family rates are 2 times the above rates if you and your spouse are both under age 65, or if you and your spouse are both over age 65.
- Age categories are based on the Retiree's age as of the Retirement Date.
- For a couple where 1 individual is over 65 (Medicare) and 1 is under 65 (Non-Medicare) **before March 1, 2010**, the monthly rate is \$352.00 per month. For a couple where 1 individual is over 65 (Medicare) and 1 is under 65 (Non-Medicare) **on or after March 1, 2010**, the monthly rate is based on the Retiree's age **plus** the Spouse's age **plus** the number of pension credits the Retiree had at the Retirement Date.
- Rates will change based on the individual's birth date. For example (based on the schedule above), if an individual is 61 years old, has 35 credits, has a birth date of June 15<sup>th</sup> and is paying \$250.00 per month, then effective June 1<sup>st</sup> (the month in which he reaches age 62) his monthly premium will decrease to \$166.00 per month. Individuals are no longer "locked" into a rate for the entire year based on their age as of March 1<sup>st</sup>.
- Future rates will be based on plan costs.
